XLR for Preamp

Vocal Mic

AC Power

**Bass - Kyser**

XLR for Preamp

Vocal Mic

(may also use stage amp)

Stage  
Left

**No Monitors Needed (we will bring our own IEM system)**

## What We Need

- 6 Microphone Boom Stands
- Four Vocal Mics
- One Instrument Mic
- Sound System

ShadowGrass will bring and use their own in-ear monitor system, including a QSC monitor mixer and a Sennheiser IEM system providing four separate aux mixes. For most venues, the easiest setup is to plug the house microphones into our stage snake and let the band run the sound for FOH and the monitors from our board and iPad. We can supply a L/R main and subwoofer output to the house and we will provide a sound tech for the show. We can also provide XLR cables for all mics and instruments. We do have a splitter that we can use so that FOH and monitors can be run separately. **Please let us know if we need to bring microphones, stands, speakers, or other sound equipment.** For some smaller venues, we may prefer to use a simple condenser microphone setup with our IEMs.
